

CORE SOLUTION

Automated Orderable Charge Testing

Maximize Charge Accuracy

Support revenue integrity initiatives with proven automated orderable charge testing and validation.

> USE CASES

- + After performing annual pricing changes, regulatory updates or adding new services
- + During priority pack/service release upgrades
- + MEDITECH implementations
- + Situations where charges aren't flowing to patient accounting

> BENEFITS

- + Cost-effective solution provides real value over other validation methods
- + Quick process with full results in as little as 15 days
- + Proven automated solution has performed flawlessly in facilities across the nation
- + Supports overall revenue integrity initiatives with a repeatable validation process.

Do You Have A Reliable, Accurate Mechanism to Test the Validity of All Your Orderable Charges in MEDITECH?

The Core Solution for Automated Orderable Charge Testing is a proven solution that demonstrates the accuracy of orderable charges in MEDITECH systems. Built and performed by MEDITECH-ready certified experts, our automated testing solution results in 100% validation of process-driven orderable charges. Provided with expert services for setup, testing, and dictionary updates, your organization can quickly and cost-effectively validate the build of orderable charges whenever it is needed.

Automated Testing Is More Than Best Practice – It's Best Experience

Ensuring that every item in your orderable charge build produces a valid result in the billing queue is a critical piece of supporting revenue cycle integrity. During the lifecycle of a MEDITECH customer, change events demand a repeatable and reliable solution for validating these processes. These include annual pricing changes, regulatory updates, service release upgrades, new service lines and new implementations.

Automated testing is more than best practice. Manual testing performed by a human sitting in front of a computer carefully going through application screens, trying various input combinations, comparing the results to the expected behavior is not only a productivity drain, but a flawed process. Spot-checking can't verify the volumes of line items available in a facility. And these methods deliver a less than ideal experience for financial decision makers as well as billing and coding personnel. That's why only an automated validation solution provides both a best practice and a best experience.

The Automated Orderable Charge Testing Solution.

Our proven, repeatable, fixed-fee solution includes all the services needed to validate orderable charges and the results to the MEDITECH Billing/Accounts Receivable (BAR) queue.

TEST AUTOMATION COVERAGE

Imaging/Radiology
Laboratory
Pharmacy (Stock Meds)
Surgery (Supplies on Preference Card)
Materials Management Patient Chargeables

SERVICES

Technical Setup
Review of Linkage Reports & Update Application Dictionaries (as needed)
Execution of Automated Testing
Reprocess testing model 2x during 5-day testing event

RESULTS

100% of processed charges send a charge to the B/AR charge queue
Review of results and future recommendations

*Client must provide access to EHR and agree to CereCore coordinating with third-parties and EHR vendor on your behalf.

Why Choose A Core Solution?

CereCore® has combined expertise, automation, and methodologies from years of successful health IT projects to provide time and cost-saving options to optimize your EHR, address regulatory compliance, and adopt new functionality. Core Solutions feature a fixed-fee or fixed scope delivery model to demonstrate quick return on investment and keep your health system moving forward.

**ONE THIRD
THE COST.**

**ONE SIXTH
THE TIME.**

Based on successful projects, our Automated Orderable Charge Testing can be completed at one-third the cost and in one-sixth the time than a manual testing event or audit.
